

# Pathify

## University of the Pacific Consolidation & Cost Savings

### At a Glance:

- Full-time enrollment: 6,755
- Faculty & Staff: 1,800
- Institution type: Private university
- SIS: Ellucian Banner
- Reduced Budget: 45%

### Portal, Mobile App and Engagement Tool → Pathify

Before Pathify, University of the Pacific relied on a legacy student portal, a basic mobile application and a separate platform for student groups and activities. This fragmented approach created inefficiencies and suboptimal user experiences.

Leveraging Pathify, Pacific consolidated these tools into one overarching hub connecting the student experience, saving I.T. staff time and reducing budget by 45%.

### Overall Consolidation

In addition to its portal app and engagement tool, Pacific consolidated 29 disparate systems — including various ad-supported event and communication tools — down to five, an 82% reduction across their tech stack.

**CTO & VP of Technology**  
University of the Pacific

"Once we realized Pathify could be that one-stop-shop, it was a simple argument to do away with our legacy portal, its separate mobile application and our student engagement platform. Now, students don't have differing experiences across web and mobile or need to log into a different system to find groups, events or communities. Everything is brought into Pathify — we're taking full advantage of the ability to consolidate front-end systems and reduce spend"
