

# Communities Plus

A unified approach to campus engagement.

## Building & sustaining digital campus life.

Pathify's Communities Plus module delivers a comprehensive, standalone solution for building and sustaining digital campus life. With groups, events, co-curricular transcripts, badging, finance management, announcements and more all hosted within a single environment, Communities Plus delivers a connected experience across the entire campus ecosystem — fostering purpose, belonging and stronger communities.

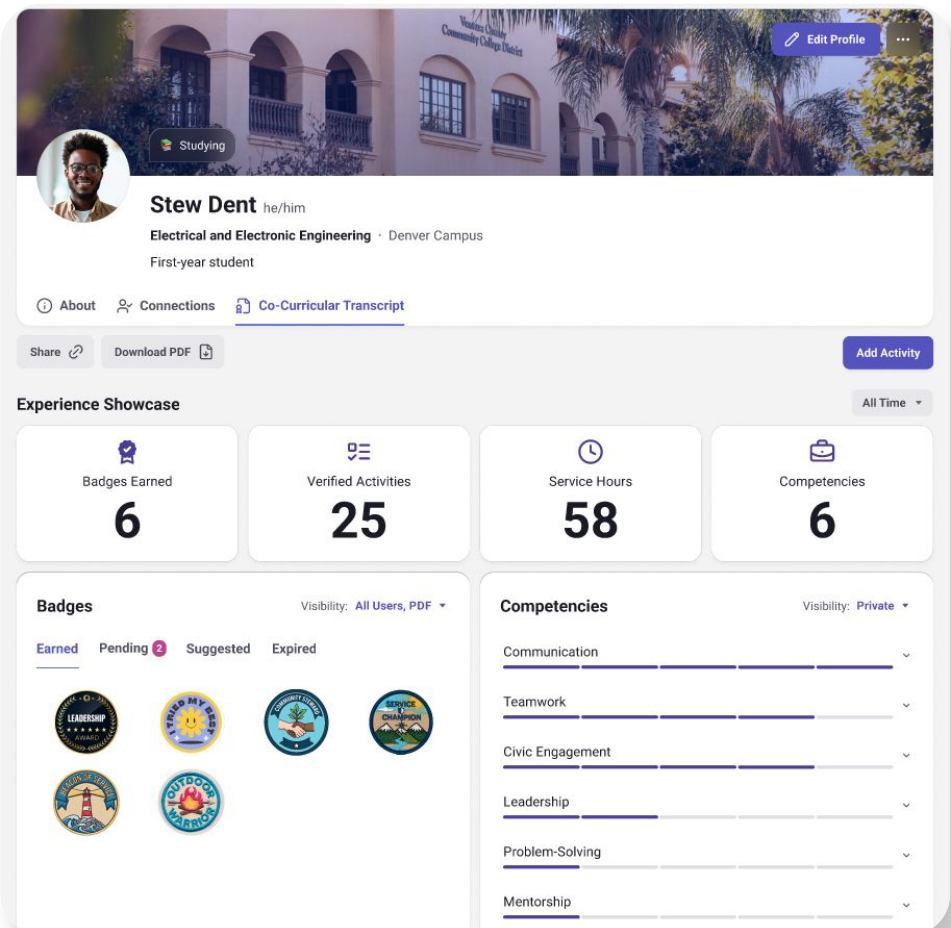

## Key Features & Functions

### Co-Curricular Transcripts & Badging

Capture service hours, competencies, leadership roles and more. Tie badges to activities or platform engagement and give students the ability to share their accomplishments.

### Modern Group Experiences

Customized dashboards, advanced group membership controls, featured clubs and integrated chats create modern, intuitive experiences while giving administrators the oversight to manage governance and compliance.

## Key Features & Functions

### Events at Scale

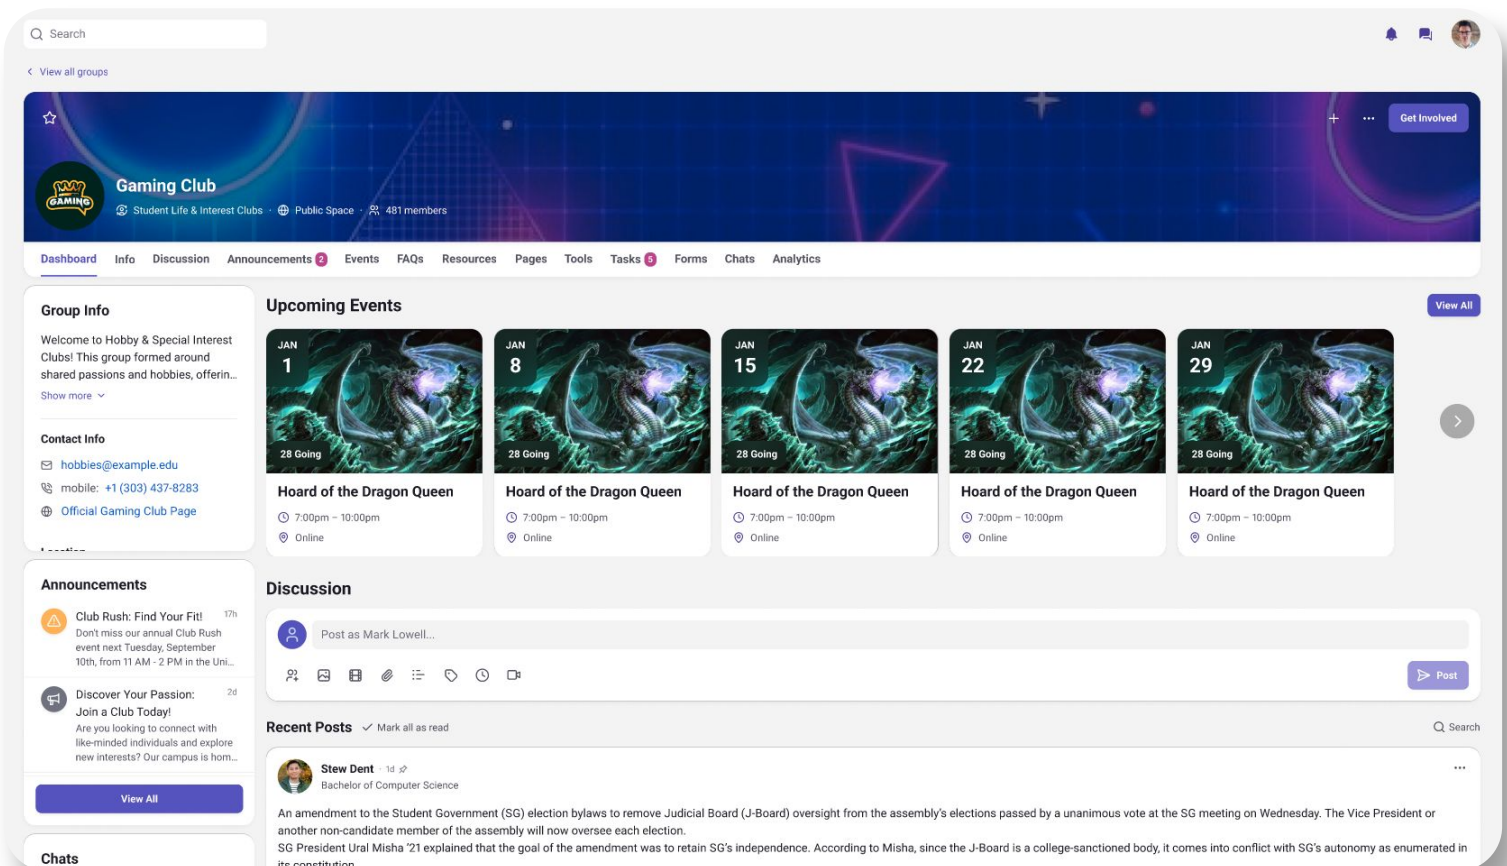

Support campus-wide programming with co-hosted events, attendance tracking, automated reminders and cross-group promotion.

### Finance Management

Simplify budgeting, dues collection and event expenses with built-in financial management tools. Reduce reliance on spreadsheets, with integrations with systems like PayPal, Stripe and other popular payment processors.

### Roles & Permissions

Built for the complexity of higher education, flexible roles, permissions and approval workflows ensure easier day-to-day management for students and staff alike.

The screenshot displays the Pathify interface for a 'Gaming Club'. The top navigation bar includes a search bar, a 'View all groups' link, and a 'Get Involved' button. The club's header features a blue and purple geometric background with the club name and member count (481 members). Below the header is a navigation menu with tabs for Dashboard, Info, Discussion, Announcements (2), Events, FAQs, Resources, Pages, Tools, Tasks (3), Forms, Chats, and Analytics.

The main content area is divided into several sections:

- Group Info:** A welcome message and contact information (email: hobbies@example.edu, mobile: +1 (303) 437-8283, and an official page link).
- Upcoming Events:** A grid of five event cards for 'Hoard of the Dragon Queen' on January 1, 8, 15, 22, and 29. Each card shows the date, time (7:00pm - 10:00pm), and status (Online).
- Announcements:** Two recent announcements, including 'Club Rush: Find Your Fit!' and 'Discover Your Passion: Join a Club Today!'.
- Discussion:** A section for posting and replying to messages, with a 'Post' button.
- Recent Posts:** A list of recent posts, including one by 'Stew Dent' (Bachelor of Computer Science) regarding an amendment to the Student Government (SG) election bylaws.

On the right side of the interface, there are buttons for 'View All' and a 'Get Involved' button.

## Why Institutions Choose Communities Plus

### ***One Connected Hub***

Communities unifies groups, events, chats, resources, announcements, co-curricular transcripts and more into one cohesive environment — across both web and mobile.

### ***Designed for Growth***

From student clubs to professional networks, from tracking service hours to hosting departmental org charts, Communities adapts to serve the entire campus — not just student orgs.

### ***Proof of Impact***

Managing co-curricular transcripts and badging ties involvement directly to learning outcomes, leadership development and career readiness, giving institutions data-informed ways to demonstrate value.

### ***Operational Efficiencies***

Built-in finance management, deep permissions, access controls and integrated workflows reduce administrative overhead.

### ***Safe, Institutionally Supported Space***

Unlike unregulated social media or third-party apps, Communities provides a secure, institution-backed platform where users can safely connect, engage and collaborate.

### ***Vendor Consolidation***

By reducing reliance on niche systems or point solutions, Communities simplifies vendor management, often resulting in consolidation and cost savings.
