# Intranet

Knowledge sharing is at the heart of every higher ed institution. Streamline communication and collaboration for individual departments, administrative units, or campus locations using Pathify's Role-based configurations. Pathify empowers faculty and staff to tailor their experience, displaying relevant information through customizable Pages and Resources.

Access Control
Pathify protects private, internal information or keeps public information in a separate, unauthenticated view.

Role-based Assignments
Cut through the clutter – utilizing Roles connects faculty and staff to the appropriate information, resources, and tasks.

Customizable Pages
Easily create dynamic Pages (or use iFrame to pull in existing content!) to showcase PDFs, links, topics, and essential information.

Dynamic Collaboration
Unbury email newsletter content and connect employees in a unified digital space with events, groups, and announcements.
